

XLeap Managed Server

Better workshops. Robust decisions.

XLeap is collaborative workshop software for robust decisions — anonymous, simultaneous, and AI-enabled.

It brings experts and stakeholders together to surface what matters, compare options, and decide with measurable alignment.

Anonymity enables honest input and reduces bias: contributions are assessed on merit, not on who shared them.

Simultaneous written contribution keeps everyone engaged and surfaces critical information early — before it becomes a risk.

AI can participate live via API — on equal footing — adding expertise, second opinions, and missing stakeholder perspectives when relevant.

Minutes in Word and exports to Excel are generated automatically.

From decision to action

XLeap helps facilitators, consultants, and project teams convert workshop outcomes into commitment, clear priorities, and actionable next steps.

XLeap Managed Server

XLeap Managed Server is a premium deployment for organizations that require dedicated 2-tier instances, maximum isolation, and controlled operations.

- Custom URL, such as company.xleap.net
- Dedicated application server instance
- Dedicated database server instance
- SSO (SAML 2.0)
- Encrypted, instantly restorable backups (snapshots)
- Integration of your enterprise AI via API
- Scales across the organization — add Host licenses as needed

Our administrators deploy and operate your Managed Server in your chosen region: AWS Virginia, Dublin, Stockholm, or Singapore — or Open Telekom Cloud (Magdeburg, Germany).

Administrative control

Center administration enables governance and day-to-day control. It includes:

- Enterprise security controls, including controls for AI access
- Reallocation of Host licenses as roles and personnel change
- Branding of login page, welcome space, and the Word minutes cover page
- Template management to standardize and scale best practice

Subscription scheme

You need an XLeap Managed Server subscription and the required number of Host licenses. Each Host license covers unlimited sessions with unlimited participants. One-time setup fee applies. Terms run from 1 to 5 years.
